## HUNTER CONCRETE MIXERS

*Code T road tow chassis.*

*Code R site trolley.*

*All models are similar in design and appearance.*

The HUNTER range of compact high output and highly manoeuvrable mixers are designed to meet the requirements of the toughest site conditions.

The drum is of all steel construction in heavy spun steel with the base cone additionally reinforced for considerable strength. The large hand wheel gives balance control throughout the 360 degrees of rotation and the drum can be loaded and discharged on either side, with a choice of two loading positions. It can be fully inverted and locked when not in use. The chassis is of all welded construction in heavy gauge steel. A choice of wheel options is available with the front wheels being turntable mounted and fitted with a drawbar. A fast tow road trailer is also available.
